

Blue Bin

VERRE · BLUE LID · SMECTOM DU PLANTAUREL

Bottles, jars and flacons.

Nothing else made of glass. Packaging glass melts at a different temperature from drinking glass, ceramics and window panes.

In or out

Glass recycles endlessly with no loss of quality — but one ceramic shard ruins a whole batch.

PACKAGING GLASS ONLY

- Glass bottles wine, beer, water, oil
- Glass jars jam, sauce, preserves
- Glass yoghurt pots
- Empty glass syrup bottles
- Flacons perfume, condiments
- Coloured and clear alike no need to separate

NEVER IN HERE

- × Drinking glasses → general waste
- × Champagne flutes → general waste
- × Porcelain & stoneware → general waste
- × Tiles & earthenware → déchèterie
- × Window & door glass → déchèterie
- × Glass wool → déchèterie
- × Light bulbs & tubes → shop take-back
- × Mirrors & Pyrex → déchèterie

Goes elsewhere

The colour shows which stream.

■ LIDS AND CAPS COME OFF

Metal jar lids and plastic bottle caps go in the yellow bin, not in the blue bin. The jar itself comes here.

■ DÉCHÈTERIE

Flat glass: windows, glazed joinery, mirrors. Also glass wool insulation.

■ GREEN BIN – TRASH

Anything you drink from or eat off — glasses, flutes, porcelain plates — even though it looks like glass

■ KEEP IT INSTEAD

A jar with its lid is a free storage container. Fill it before you recycle it.

BEFORE YOU
DROP IT IN

Empty and scraped. No need to rinse — the furnace does the rest.

No bags in the container. Drop the glass in loose and take the bag home.

Item list from **SMECTOM du Plantaurel — Mémo Tri 2026**. Handling rules are the national French sorting instructions.

Colours match **our bin lids** — yellow recyclables, green trash, blue glass — not the mémo's own legend, which colours glass green and paper blue.

■ listed in the mémo □ general rule for this stream × does **not** go here
